

# Getting Started with iPad

Ignite the creativity in your students today.

**Free**

## Discover how to enhance your classroom experience.

Learning with iPad in the classroom is a 90-minute workshop for teachers aspiring to enhance classroom experience. As a participant, you will be a relative novice in the iPad universe. Under expert guidance from experienced educators who are Apple Professional Learning Specialist, you will explore the capacity of the iPad to expand the ways students think, problem solve and create.

### What you will learn...

#### Skills

iPad learning is a motivational goldmine, enabling students to interact with content in ways previously unimaginable. The skills teachers require to maximise edtech potential can take time to

#### Resourcefulness

Today's world demands resourcefulness in accessing and using tools for collaboration, presentation and communication. Learning with iPad helps you and your students experience the satisfaction of exploration and discovery while producing

#### Practical

Learning with iPad workshop builds the confidence to apply skills and resourcefulness in creative and experimental ways. iPad supports a vast range of applications for learning across all subjects, and familiarity can make them integral to improved educational outcomes.

Professional Learning Specialist
