

# Virtual Sessions

Receive iPad support and ignite the creativity in your students today with our live Zoom sessions

## Creative live Zoom sessions directly into your classroom

Get ready to blend technology and teaching with creative and engaging fun! We visit your classroom live through Zoom using the iPad to bring our expertise and resources, bringing the curriculum to life. A tad overwhelmed? Don't fret - our Apple Professional Learning Specialists have a cornucopia of ideas to get you started. So yes, teaching just got a whole lot more exciting!

### How it works...

#### Curriculum Aligned

You choose what you would like focus on. We look to align with the curriculum to use the iPad with relevant content that you are required to teach. Resources are sent prior to each lesson - and yes, they are yours to keep, share and edit.

#### Your Schedule

We use Calendly to work in with *your* schedule. This allows you to select and book your 45-minute session when it works for your teaching programme. This could either be 1:1 or in the classroom with the children. How many sessions? Talk to the boss!

#### What do we cover

We integrate the core Apple native Apps (Pages, Keynote, Numbers, iMovie, Clips, GarageBand and Freeform) along with relevant quality third-party Apps into engaging and relevant workflows that cover curriculum and the General Capabilities.

For more information contact your Principal or visit our website or scan the QR code <https://nextlearning.com.au/services/next-professional-learning/>
